

CATTs BUSINESS SOLUTIONS LLC

CAPABILITY STATEMENT

Cybersecurity Readiness • Compliance Documentation • Federal Teaming Support
TEAMING-READY CYBER, COMPLIANCE & READINESS SUPPORT FOR GSA, HHS & DOD-ALIGNED PRIME CONTRACTORS

Ridgewood, NJ | cattsbusinessolutions.com

Helen Tanyi, CEO | (201) 455-6010 | helentanyi@cattsbusinessolutions.com

CATTs Business Solutions LLC is a WOSB and EDWOSB federal services firm helping government delivery teams strengthen cyber readiness, compliance documentation, governance, and supply-chain risk management. CATTs targets opportunities supporting the Department of Defense, with a specific focus on the Department of the Army; the Department of Health and Human Services, including CMS and CDC; and the General Services Administration. For Army and other DoD-aligned opportunities, CATTs provides cyber-readiness assessments, applicable NIST SP 800-171 gap analysis, compliance documentation, remediation planning, supply-chain risk support, and executive-ready reporting. For HHS-aligned opportunities, CATTs focuses on cyber governance, risk, and compliance consulting; security-control assessments; audit support; continuous-monitoring readiness; and documentation supporting CMS, CDC, and broader HHS mission environments. For GSA-aligned opportunities, CATTs focuses on Technology Transformation Services and information-technology acquisition requirements. Across these target markets, CATTs delivers clearly scoped assessments, prioritized findings, surge documentation support, and remediation-ready deliverables without overstating certification, contract-holder status, agency relationships, or award outcomes.

2. TEAMING ASK

Seeking subcontracting, workshare, and task-order opportunities with established prime contractors and contract holders pursuing Army, HHS, and GSA cyber, GRC, and information-technology requirements.

110 NIST SP 800-171 controls	Prioritized risk findings	Rapid gap-analysis packages	45-60 days readiness planning target	<2 hours response service level	Efficiency compliance-process focus
--	-------------------------------------	---------------------------------------	--	--	---

CORE COMPETENCIES

Federal Cybersecurity Readiness NIST SP 800-171, FISMA, and future CMMC-aligned assessments, gap analysis, and remediation roadmaps	Compliance Documentation SSPs, POA&Ms, policies, control evidence, and executive-ready remediation packages
IT & Financial Controls Financial-system controls, vulnerability assessments, HIPAA/ePHI safeguards, and SOC 2 readiness	Risk Advisory & Program Support Cyber-risk posture, program governance, supply-chain risk, and vulnerability mitigation

KEY DIFFERENTIATORS

Prime-Ready Work Packages Defined scopes, concise deliverables, and executive-ready remediation language for capture and delivery teams	Cyber + Financial Control Lens Integrated view of cybersecurity, governance, financial-system controls, and operational risk	Small-Business Teaming Value WOSB/EDWOSB status, rapid mobilization, and NIST SP 800-171 readiness with future CMMC alignment
---	--	---

PAST PERFORMANCE

INTERNATIONAL GOVERNANCE (UN)	HEALTHCARE SYSTEMS	REAL ESTATE & INFRASTRUCTURE
DOD-RELEVANT GLOBAL INFRASTRUCTURE 6 AUDIT CYCLES Outcome: Managed 13+ prioritized enterprise recommendations strengthening continuity, resilience, and disaster recovery across the United Nations Secretariat from 2018-2023. Scope: Assessed financial platforms, cloud migrations, global endpoints, encrypted satellite links, data centers, and perimeter controls amid heightened cyber risk.	HHS-RELEVANT HEALTHCARE SECURITY 25+ GAPS PER FACILITY Outcome: Advanced healthcare operations toward continuous compliance and external review readiness while strengthening ePHI safeguards. Scope: Validated HIPAA Security Rule and NIST SP 800-66 alignment; assessed hospital networks, EHR platforms, legacy medical-device endpoints, IAM, and segmentation.	GSA-RELEVANT ENTERPRISE OPERATIONS 30+ GLOBAL OFFICES Outcome: Strengthened continuity across a global real estate enterprise with 6,000-8,000 employees and broad U.S. operating footprint. Scope: Conducted continuity, disaster-recovery, physical-security, SOC 2/CIS, IoT, OT, and financial-control assessments across U.S., Europe, and Asia operations.

PROCUREMENT FIT

Best Fit Subcontracting, task-order support, cyber documentation, compliance engineering, and readiness work packages	Target Buyers Prime contractors, capture teams, delivery executives, and federal program teams supporting GSA, HHS, and DoD-aligned work	Engagement Model Rapid discovery, defined scope, prioritized findings, executive-ready remediation roadmap, and optional delivery support
